Objectives:

- Revisit Florence Nightingale’s wider legacy for the 21st century
- Introduce an innovative nurse-developed response to this legacy
- Identify key inter-related 21st century global health problems — relevant to Nightingale’s wider legacy

Why Florence Nightingale?

She is remembered for her work in hospital design...
In Florence Nightingale’s Wider Footsteps

still appreciated today

...as a humanitarian &
as a nursing administrator
for her nursing education
for her work on sanitation advocacy

for her work on statistics
health outcomes & in health policy
& pioneering as an environmentalist

She is loved by the whole world...

& for her communications expertise

for her priority to focus nurses & everyone on the health of mothers & their infants...

In Florence Nightingale’s Wider Footsteps
Envisioning What 21st Century Nursing Can Be

She called all of this “Health-Nursing”

Florence Nightingale
1893

What would have she done with Email Facebook & YouTube?

“Health is not only to be well but to use well every power we have.”

Florence Nightingale
1893

Envisioned in 2000 & created in 2003,
Nightingale Initiatives for Global Health
now in 2011, building for a second decade of innovation

in her wider footsteps we aim to:

- create greater awareness about the health of all humanity
- empower nurses & concerned citizens to share information & resources —
- advocate — to EVERYONE — for the critical global health issues of our time!

in 2004

Beginning with a global outreach ‘Nightingale Declaration’

“We, the nurses and concerned citizens of the global community, hereby dedicate ourselves to achieve a healthy world by 2020. We declare our willingness to unite in a program of action, to share information and solutions and to improve health conditions for all humanity — locally, nationally and globally. We further resolve to adopt personal practices and to implement public policies in our communities and nations — making this goal achievable and inevitable by the year 2020, beginning today in our own lives, in the life of our nations and in the world at large.”

**2010 International Year of the Nurse & Florence Nightingale Centennial**

Nurses—Making a Difference in Global Health

A collaborative, grassroots, global initiative honoring nurses' voices, values and wisdom — to act as catalysts for achieving a healthy world.

The 2010 International Year of the Nurse is the centennial year of the death of the founder of modern nursing — Florence Nightingale (1820-1910). To celebrate, the 2010 International Year of the Nurse was established to notably mark the world's nurses — estimated to be more than 13 million — in a celebration of commitment to bring health to their communities, locally and globally.

What's New

- 2010 International Year of the Nurse
- Nurses Day June 12, 2010
- International Day of the Midwife May 5, 2010
- International Day of the Midwife May 5, 2010

8 million children suffer & die every year — 10,000 infants & children every day

500,000 women & girls suffer & die every year — 1 per minute, every day — from preventable causes related to pregnancy & childbirth

Identifying key problems

Two critical global health goals continue to miss their mark: Child & Maternal Health — UN MDGs 4 & 5 —

Embracing the future of global health with a bold, innovative, and integrative nursing perspective
